

Cover Letter

I am currently working as a DevOps Engineer for 4+ years on an Operations Team responsible for monitoring, troubleshooting, Automation, deployment and maintenance activities required to support a large scale, high availability, 24x7 production environment.

I have broad experience with tasks of numerous setup and situations across the Major Cloud Platforms (AWS, Azure, Oracle, DigitalOcean). I have been Involved in managing production environments, automation of infrastructure setups using Ansible, shell scripts and Python. I also work with the development team to create Continuous integration pipelines and processes using various CI tools, and being involved in deploying and configuring web applications. I also promptly support users when there's an issue with application or user experience on application. I believe that the skills and experiences I have gained at this position make me an ideal candidate for the job.

I am always eager to learn more and gain more experience and I am certain I will be a valuable addition to your organization.

I have also attached my resume. I look forward to meeting with you and discussing in more detail.

Yours faithfully,

Obaweya Oluwaseyifunmi
